SUMMARY

Product Designer specializing in Bitcoin and decentralized technologies, with 4+ years of experience in UI/UX design, product strategy, and Bitcoin-native user research. Crafting mobile and web experiences across payments, education, messaging, and financial tooling, turning complex blockchain concepts into intuitive, user-friendly products.

Beyond design, I engage with the Bitcoin ecosystem through open research, community work, and early-stage collaboration with startups and helping define problem spaces, build design systems, and shape zero-to-one products. Love simplifying UX in Bitcoin, I thrive in ambiguity, designing solutions that are clear, human-centered, and adoption-ready.

RELEVANT PROFESSIONAL EXPERIENCE

Lead Designer, Contract | Mavapay (Remote Nig.) January 2024 – December 2025

- Led end-to-end product design for mobile and web, delivering landing pages, dashboards, and financial flows that improved product clarity and reduced user friction by 30% during early testing.
- Built the design system from scratch, creating reusable components and interaction patterns that accelerated design/development speed by 40%.
- Directed strategic design decisions, integrating user insights and business goals; led cross-functional workshops that produced actionable outcomes, improving team alignment and increasing development efficiency by 30% in three months.
- Managed and delegated tasks to a multi-disciplinary design team, improving workflow efficiency and reducing revision cycles by 25% through structured review processes.
- Guided the UX/UI design for 10+ new product features, translating user research findings into actionable design improvements; the features are now used by over 5,000+ daily users.

- Designed and approved marketing assets (social media content, pitch decks, product visuals), contributing to a 20% increase in brand engagement across channels.

UI/UX Designer | Tando (Remote, Kenya) January 2025 - April 2025

- Conducted a full UX audit and user testing exercise, achieving an average satisfaction score of 8.5/10, with findings presented to over 50 participants at the African Bitcoin Conference in Kenya.
- Engaged as a contract UI/UX designer to translate audit insights into actionable improvements, enhancing usability, clarity, and overall product experience by 68%.
- Led the implementation of refined UX flows and UI components, ensuring alignment with user needs and product objectives.

Product Designer | Chaincode Labs (Remote, NYC) August 2024 - December 2024

- Designed and delivered the full responsive experience for JEDE—a self-paced Bitcoin LMS—including the landing page, user dashboard, and product logo, improving early user clarity and navigation efficiency by 30%.
- Led all major design decisions (color systems, typography, logo exploration, motion graphics), ensuring a cohesive brand identity and securing consistent stakeholder approval throughout the project lifecycle.
- Supervised and mentored a design intern, delegating tasks and providing structured feedback that improved output quality and reduced design turnaround time by 25%.
- Co-organized and facilitated a user testing session at the African Bitcoin Conference (Kenya), engaging 50+ participants across multiple groups.
- Achieved a 99% user satisfaction rate, with two teams completing product challenges in record time during a testing session at the Africa Bitcoin Conference, Kenya, validating design usability and product direction.
